

Literacy Logic Student in Michigan Is Accepted Into University Preparatory Academy

Dustin Clarke, 4th grade
learning multiplication facts.

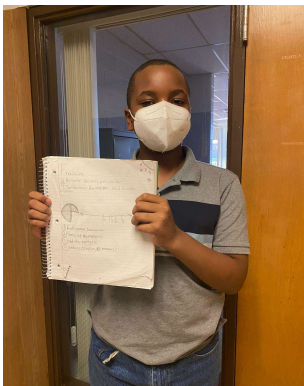

According to data from the Michigan Department of Education (MDE), 27% or 3,931 of 4th-grade students who took the NWEA MAP Growth Math Assessment were considered “significantly behind grade level” in the fall. Dustin Clarke, a student in the Literacy Logic’s Accelerated Math Program has been accepted to University Middle and High School Academy in Southfield, Michigan. Dustin Clarke joined the Accelerated Math Program in March 2020.

Dustin received tutoring on a virtual platform with Briana Young, CEO and Founder of Literacy Logic, to develop his skills in math. The Accelerated Math Program gave Dustin the foundational math skills to excel in his grade level. When Dustin first enrolled in the Accelerated Math Program, he was struggling in mathematical concepts such as fractions, multiplication, word problems, and division.

The Accelerated Math Program focused on Dustin’s foundational skills in Math. Dustin started to be more confident in math and started to assist students in his class. Dustin was a model student and learn to love math. Morris Alder Elementary School stopped at the 5th grade, so Dustin had to look for another school. He wanted to stay in the Southfield district and wanted to get into a more prestigious school. Dustin wanted to take the entrance examination for University Middle and High Academy.

Dustin prepared for the exam with the Accelerated Math Program. Dustin was really focused and determined to learn every bit of information at a fast pace. He was very inquisitive and eager to do his very best while staying on top of his academic work. After four weeks of waiting for the results, Dustin took a picture of his acceptance letter to attend University High School Academy.

To enroll your child in the Literacy Logic Accelerated Math Program please send an email request with your child’s name and grade to literacylogic@gmail.com or call 313-549- 1975.
