

Beating The Odds: Literacy Logic Student Exceeds State Standards on the Reading and Math Sections of NWEA Test at American Montessori Academy

Studies have shown that black and brown students are more likely to be retained due to their inability to read at a third-grade reading level. According to data from the Michigan Department of Education (MDE), 5.8% or 2,300 students in the State of Michigan were held back because they did not meet the third-grade reading level requirements in 2021. Camden Hardy, a student in the Literacy Logic's Rocket Reader Program has met grade level standards in Math and Reading on the 2022 NWEA Assessment at American Montessori Academy in Livonia, Michigan. Camden a 1st grader, joined the Rocket Reader Program in September of 2022.

Camden receives tutoring on a virtual platform with Briana Young, CEO and Founder of Literacy Logic, to develop his skills in reading and math. The Rocket Reader program gave Camden foundational math and reading training to master skills required for his grade level. When Camden first enrolled in the Rocket Reader program, his teacher sent home a third-grade reading law letter. This letter stated that Camden's performance in reading was not on the appropriate grade level and is on the track to being held back by the third grade if improvements were not made.

Camden Hardy, 1st grade awarded certificates of achievement for meeting the NWEA Reading and Math Goal.

The Rocket Reader program focused on Camden's foundational skills in Math and Reading. As Camden continued to make progress he became very excited about learning. He wanted to be challenged and was dedicated to do his best work in class. Camden's NWEA score at the beginning of the school year was a 132 scaled score which was very low for his grade level. By the end of the school year, Camden scored 165 in Math and scored 167 in Reading placing Camden right at grade level. Camden was awarded certificates for his accomplishments in both subjects by his teacher.

Camden is now in the second grade and reading at an 3rd grade level. He reads chapter books and continues to build on vocabulary skills daily. He is the top of his class and a model student to his peers.

To enroll your child in the Literacy Logic Rocket Reader program please send an email request with your child's name and grade to literacylogic@gmail.com or call 313-549- 1975.
